Inline Peak Power Sensor

MA24103A

True-RMS, 25 MHz to 1 GHz

MA24105A

True-RMS, 350 MHz to 4 GHz

Introduction

The Inline Peak Power Sensors provide a forward direction path, a 4 MHz bandwidth channel that has peak and comparator/integrator circuits that add measurement functions such as peak envelope power (PEP), crest factor, complimentary cumulative distribution function (CCDF), and burst average power. The reverse direction reverse power measurement capabilities including reverse power, reflection coefficient, return-loss, and SWR. A “dual path” architecture enables true-RMS measurements over the entire frequency and dynamic range. The presence of a micro-controller along with signal conditioning circuitry, ADC, and power supply in the Inline Peak Power Sensors make a complete miniature power meter.

The Anritsu MA24103A Inline Peak Power Sensor is designed to take accurate average power measurements over 2 mW to 150 W from 25 MHz to 1 GHz. The MA24103A measures CW and multi-tone signals.

The Anritsu MA24105A Inline Peak Power Sensor is designed to take accurate average power measurements over 2 mW to 150 W from 350 MHz to 4 GHz. The MA24105A measures CW, multi-tone, and digitally modulated signals such as GSM/EDGE, CDMA/EV-DO, W-CDMA/HSPA+, WiMAX, and TD-SCDMA.

Features

- Used with a personal computer via USB running Microsoft® Windows and complimentary Anritsu PowerXpert™ software v3.49 or later
- Forward and reverse measurements of both transmitted power and reflections from antenna or other system components using the single inline sensor
- The MA24105A true-RMS measurements to 150 W enables accurate average power measurements of modulated signals such as WLL, GSM/EDGE, CDMA/EV-DO, W-CDMA/HSPA+, WiMAX, and TD-SCDMA
- High crest factor signal and base station transmitter output power measurements
- Compatible with most Anritsu RF and microwave handheld instruments with high accuracy power meter software Option 19. Refer to your instrument technical data sheet or contact your sales representative to ensure compatibility.
